RELIGION, EDUCATION, CRIME.

Under the head Ecclesiastical will be found a return showing the number of Ministers of Religion, &c., of each denomination for the year 1872, from which it appears there were 503 Ministers, and 976 Churches and Chapels; with sittings for 158,557 persons. The average attendance is stated to be 144,942; and there was also an attendance of 34,403 persons at other places used for public worship. The number of Churches and Chapels had increased from 924 to 976, and there was a difference in the average attendance of over 2,700 persons in excess of the previous year. Page 16.

Sunday Schools.

Page 17. These Schools had increased from 933 in 1871, to 962 in 1872; and the teachers numbered 6,234, which is 185 over the number recorded in 1871. The average number of scholars which was given in 1870 as 52,327, and in 1871 as 51,447, again shows a decrease in 1872, when they are given as 49,027. I do not place much reliance on the accuracy of these figures, but give them as collected from the returns furnished.

Day Schools.

Page 18. The number of Private Schools has decreased from 561 in 1871 to 551 in 1872, but those employed in tuition had increased by 55. The number of those receiving instruction was 16,286, viz.:—7,194 males and 9,092 females. As compared with the previous year there was an increase of 2,586 scholars.

Page 19. The Protestant and Roman Catholic Orphan Schools afford instruction to 597 children; the Randwick Institution to 795; and the Industrial Schools to 177,—the numbers in all these Schools being about the same as the previous year.

Page 19. Schools under the Council of Education were 902 in number, being an addition of 24 on the year 1871. The scholars, which in 1871 were 62,295, advanced to 88,487 in 1872, showing the large increase of 26,192,—the average number of pupils to each School being 98. The sum granted by the Government from the Treasury was £123,601 10s. 11d., which included £1,601 10s. 11d. from the Clergy and School Estate Revenue Fund. The amount of £50,148 19s. 9d. was received from voluntary contributions, fees, &c. The total from both sources amounted to £173,750 10s. 8d. To show more clearly the progress or otherwise made by each class of Schools, by comparing the year 1872 with the previous year the following figures are now given:—

	1871.			1872.		
	No. of Schools.	No. of Teachers.	No. of Scholars.	No. of Schools.	No. of Teachers.	No. of Scholars.

It will be seen that the increase in the number of scholars in the Public Schools was 16,846, and in the Denominational Schools, 9,346; the principal additions being in the Church of England and Roman Catholic Schools, which were 5,073 and 3,618 respectively. Of the total number of scholars in 1871, 61·12 per cent. attended Public Schools, and 38·88 per cent. Denominational Schools. In 1872 the percentage was for the former 62·07 and for the latter 37·93.

As compared with the previous year there is a decrease of 36 cases. Out of the above number of committals 243 went to trial, which resulted in 172 convictions and 70 acquittals. In Quarter Session cases the committals numbered 764, being an increase of 25 on the previous year. The cases which were sent to trial were 691, and 471 convictions were obtained, the remaining 220 being acquittals. From the Summary Jurisdiction Returns it will be seen that *18,928 persons were taken into custody during the year 1872, the males numbering 14,684, and females 4,244. The convictions were 13,552, committals 1,049, and discharges 4,325. The total cases of persons taken into custody for drunkenness was 9,727, consisting of 7,308 males, and 2,419 females. NOTE.—The large apparent decrease in the export of Wool *viâ* Moama is caused by the fact that under the regulations issued by the Collector of Her Majesty's Customs, all wool brought by steamer to Echuca from the Murrumbidgee, Edward, and Lachlan Rivers, is ordered to be included in the Swan Hill return, and not, as in former years, in the Moama return.

Act of Council under which levied.	SPECIFICATION OF TAXES, DUTIES, &c.—*continued.*	Authority under which originally established.	At what Period.

FITZ ROY DRY DOCK, COCKATOO ISLAND.

Conditions.

All vessels belonging to H. M. Navy, the Colonial Government, and men-of-war of other nations, will be admitted to repair in the Fitz Roy Dock, Sydney Harbour, free of any dock dues or rates, but they will be required to repay all actual expenditure of stores, wages, and material.

All other vessels will be liable to a minimum dock-rate of 6d. per ton per diem, if of 1,500 tons register or upwards, and an additional $\frac{1}{8}$th of a penny per ton for every decrease of 50 tons or portion of 50 tons down to a maximum rate of 9d. per ton for a vessel of 300 tons, and all below, as set forth in the scale attached hereto.

Double rates will be charged for the day of docking.

The Dock dues will include and cover the cost of pumping, shoring, wedges, and blocking, and the cost of all labour connected with opening and closing the Dock, and all incidental labour connected with the actual operation of docking a vessel.

No vessel will be permitted to enter the Dock with gunpowder or combustible ammunition on board.

Workshops and Machinery.

Vessels in Dock and private engineering establishments will be permitted to avail themselves of any portion of the machinery of the Dockyard workshops on payment of a rate per hour; preference being always given to the requirements of a vessel in Dock. These charges will be in addition to Dock dues, and in accordance with the rates mentioned in the subjoined Schedule.

The rate for the machinery will include the cost of putting and maintaining the machine in motion, the use of the 20-ton overhead traversing crane, and all tools belonging to the Machine in use, but nothing further.

These thermometers were made by Mr. Grimaldi, of Melbourne, and the lengths are 20 feet, 11 feet, 6 feet, 3 feet 6 inches, and 1 foot 1 inch. One foot of each is occupied with the scale, and is above ground. Before they were put in, they were compared with a standard thermometer from Kew, and the errors then determined have been applied to the above results. A pit 20 feet deep and 4 feet in diameter was dug in the Observatory grounds, to receive them; and the strata cut were as follows:—5 feet red clay, with a few stones in it; 7 feet bands white clay and iron-sandstone; 8 feet solid sandstone. The thermometers were carefully placed vertical, and the pit filled in with the material which came out of it, care being taken to put sand round the bulb of each. There is a wooden case, 3 inches square, round the stem of each thermometer, and a wooden case, with a glass front, protects the scales from the weather. The readings can be taken through the glass front.

All the thermometers, with the exception of Nos. 2,613 and 8,569, have been corrected to No. 2,661, adopted as a standard. This thermometer was compared with a Kew standard at the Sydney Observatory, on the 3rd November, 1870, and found to read 0·28 too high, but this correction is not taken into account in the above results.
